

OLIVER CHEN

Blockchain Developer

oliver.chen@crypto.io | +1 (555) 101-2020 | Toronto, ON

PROFESSIONAL SUMMARY

Forward-thinking Blockchain Developer with deep expertise in decentralized application (dApp) architecture and smart contract development. Adept at navigating the complex web3 ecosystem to build secure, transparent, and scalable financial protocols.

EXPERIENCE

Smart Contract Engineer

2021 - Present

DeFi Labs

- Authored and deployed complex Solidity smart contracts for a decentralized exchange (DEX) handling \$50M+ in daily volume.
- Conducted rigorous unit testing and security audits using Hardhat and Slither to prevent reentrancy and overflow attacks.
- Integrated Chainlink oracles for secure off-chain price feeds.

Backend Web3 Developer

2019 - 2021

NFT Marketplace XYZ

- Built scalable backend services using Node.js to index and serve blockchain data via Ethers.js.
- Developed an automated minting pipeline for large-scale NFT collections.

EDUCATION

B.S. in Computer Science

University of Toronto

TECHNICAL & PROFESSIONAL SKILLS

Solidity, Ethereum, Web3.js, Ethers.js, Hardhat, IPFS, Smart Contract Auditing, Cryptography
