

MARCUS THORNE

Machine Learning Engineer

m.thorne@email.com | +1 (555) 333-4444 | San Francisco, CA

PROFESSIONAL SUMMARY

Results-driven AI/ML Engineer specialized in developing scalable predictive models and deploying deep learning frameworks. Adept at bridging the gap between theoretical machine learning research and practical, high-performance production systems to drive business value.

EXPERIENCE

Senior ML Engineer

2020 - Present

NeuroTech Solutions

- Architected and deployed a transformer-based NLP model that improved customer support ticket routing accuracy by 42%.
- Optimized model inference latency by 30% using ONNX runtime and TensorRT.
- Led a team of 4 junior engineers in establishing MLOps pipelines using MLflow and Kubernetes.

Data Scientist

2017 - 2020

Quantify Analytics

- Developed churn prediction models using XGBoost, saving the company \$1.2M in retained ARR.
- Conducted A/B testing and statistical analysis to validate model performance in production.

EDUCATION

Ph.D. in Computer Science (Artificial Intelligence)

Stanford University

TECHNICAL & PROFESSIONAL SKILLS

Python, PyTorch, TensorFlow, Scikit-Learn, MLOps, Docker, Kubernetes, NLP, Computer Vision
